Director of the United States Patent and Trademark Office

FEB -1-2003

Dear Director Rogan:

This is in regard to the application for patent term extension for U.S. Patent No. 5,681,932, filed by Eli Lilly & Company under 35 U.S.C. § 156. The human biological product claimed by the patent is Xigris (droctrecogin alpha), which was assigned biological license application (BLA) No. 125029/0.

A review of the Food and Drug Administration's official records indicates that this product was subject to a regulatory review period before its commercial marketing or use, as required under 35 U.S.C. § 156(a)(4). Our records also indicate that it represents the first permitted commercial marketing or use of the product, as defined under 35 U.S.C. § 156(f)(1), and interpreted by the courts in *Glaxo Operations UK Ltd. v. Quigg*, 706 F. Supp. 1224 (E.D. Va. 1989), *aff'd*, 894 F.2d 392 (Fed. Cir. 1990).

The BLA was approved on November 21, 2001, which makes the submission of the patent term extension application on January 11, 2002, timely within the meaning of 35 U.S.C. § 156(d)(1).

Should you conclude that the subject patent is eligible for patent term extension, please advise us accordingly. As required by 35 U.S.C. § 156(d)(2)(A) we will then determine the applicable regulatory review period, publish the determination in the *Federal Register*, and notify you of our determination.

Please let me know if we can be of further assistance.

Sincerely yours,

Jane A. Axelrad
